WORK EXPERIENCE

Full Stack Developer & AI Specialist | **Ingeniería Digital** Aug. 2025 – Present

- **Insurance Brokerage Core Platform:** Technical leadership in end-to-end digital transformation for insurance brokerage operations, covering policy administration, claims management, analytical reporting, carrier catalogs, and client management.
- **Insurtech Platforms & CRM:** Full-stack development, maintenance, and feature enhancement for the core web portal and CRM of **Asegúrame (Honduras)**, a leading Insurtech platform for online insurance quoting and policy issuance.
- **Regional Marketplaces:** Engineering development of **Shopineoh** (Fundación Terra Te Impulsa) focused on MSME digitalization, along with custom feature implementations for **Patascr.com** (Costa Rica).
- **Automation & AI Workflows:** Orchestrating automated workflows using n8n, continuous version control via GitHub, accelerated prototyping (Lovable, Replit, Supabase), and engineering Model Context Protocols (MCP) for intelligent system integration.

Software Engineer / Programmer Analyst | **Televicentro & Emisoras Unidas** Nov. 2022 – Aug. 2025

- **Financial Systems Engineering:** System analysis, design, and development of the corporate Travel Expense Management System, streamlining request approvals and financial reconciliations.
- **High-Volume Data Management:** Comprehensive management of relational and document databases (PostgreSQL, MSSQL, MongoDB) utilizing T-SQL to optimize queries and data governance for over 800 active users.
- **Internal Social Platform (FIKA):** Feature enhancement, performance optimization, and continuous updates for the corporate internal communication platform.
- **Cross-Departmental Support & Version Control:** Delivering technical solutions across Marketing, Commercial, Production, and Broadcasting departments using React, TypeScript, C#, Laravel, and Visual Basic with Git/GitHub.

Software Development Intern | **Televicentro & Emisoras Unidas** Jun. 2022 – Nov. 2022

- Development of software prototypes and creation of internal web solutions adhering to web standards and clean coding best practices.
- Assisting in technical requirements analysis and system integration for enterprise users.

SKILLS & TECH STACK

Technical ecosystem grouped by specialization domains and core software engineering tools:

💻 FULL STACK DEVELOPMENT, CLOUD & CORE LANGUAGES

C# (.NET Core) · **TypeScript** · **React** · **Next.js** · **Laravel** (PHP) · **AWS Amplify** · **AWS S3** · **JavaScript** (ES6+) · **Node.js** · **HTML5 & CSS3** · **Visual Basic / T-SQL** · **Git & GitHub** · **RESTful APIs**

🤖 ARTIFICIAL INTELLIGENCE & AUTOMATION ECOSYSTEM

Claude Suite (Claude Code, Claude Design) · **MCPs** (Model Context Protocols) · **n8n Workflow Automation** · **Supabase** · **Lovable** · **Replit** · **AI API Integrations**

🗄️ DATABASES & SOFTWARE ARCHITECTURE

Microsoft SQL Server (T-SQL) · **PostgreSQL** · **MongoDB** (NoSQL) · **CRM Architecture Design** · **Query Optimization** · **Agile Methodologies**

EDUCATION & ACADEMIC BACKGROUND

Bachelor's Degree in Administrative Informatics (B.S.) | Universidad Nacional Autónoma de Honduras (UNAH) — 2018-2022

Laravel 9 - Web Applications with PHP & MVC | Udemy | Technical Certification

React from Scratch: Hooks & State Management | Udemy | Advanced Frontend Development with TypeScript
